

Shape Your Destiny

CONSCIOUSLY CHANGE AND DIRECT YOUR LIFE'S DESIGN

A One-Day Workshop for Women and Men

by Ghata

We each create our own experiences and thus that we are able to change our lives. Knowing that you are the creator of your experience, in this life-changing workshop you will get clear about your present values and the conscious or unconscious rules you might hold around them.

In Shape Your Destiny will discover if these values are still supporting the direction that you would like to take life. Most importantly you will gain clarity on the true source of some of your challenges and understand how unconscious values have kept you limited in all areas of your life. As the day progresses, you become more aware of hidden priorities and inner rules you are able to change your values in a way that helps you to direct your destiny consciously.

We will finish the day with guided energy work to support you to let go of your old values and makes space for the new vision.
